PERIOD

RANKED JUSTIFICATION

06 / 10

Rank these from strongest to weakest for the tap-water hypothesis:

1. sick residents mostly drank tap water;
2. two bottled-water residents stayed healthy;
3. flooding occurred near the well;
4. one sick resident also swam in the river.

Students defend the top and bottom rank in one sentence each.

- Top evidence: Why:

- Bottom evidence: Why:
