

Truck Evidence and Priority

NAME _____ DATE _____ PERIOD _____

No-workbook access: clue sets and evidence boundary

Use this packet only when *Find Your Future* pp. 154-155 are unavailable, enlarged access is needed, or your teacher assigns Canvas annotation. Otherwise, write in the workbook.

Evidence boundary: A dashboard light points toward a system. A code reader narrows an investigation. Neither one proves the failed part, the repair, or whether a vehicle is safe to drive.

Word bank: clue = supplied fact · concern = broad system to inspect · conclusion = claim that still needs proof · priority = order for responding

Model: Temperature light + very hot engine = possible cooling or temperature concern. This does not prove one failed part. A trained inspection and approved vehicle information are still needed.

ISSUE 1

Oil light on · engine-oil code · dark oil · engine feels hotter than usual

Two exact clues: _____

Broad concern: _____

Not proved yet, and evidence still needed:

ISSUE 2

Battery light on · battery-related code · truck struggles to start · interior lights are dim

Two exact clues: _____

Broad concern: _____

Not proved yet, and evidence still needed:

Issue 3 and Issue 4

ISSUE 3

Temperature light on · engine-temperature code · engine very hot · steam under hood · radiator fan runs constantly

Two exact clues: _____

Broad concern: _____

Not proved yet, and evidence still needed:

ISSUE 4

Tire-pressure light on · tire-pressure code · tires look slightly flat · truck pulls to one side · tires feel soft

Two exact clues: _____

Broad concern: _____

Not proved yet, and evidence still needed:

PRIORITY

Rank 1 means the quickest stop-and-inspect response. A lower rank does not mean safe to ignore.

ISSUE	1	2	3	4
My rank				

Top two issues and the clue that supports each choice:

Safe next steps and exit check

Do not prescribe a part, tool setting, or repair.

TOP ISSUE 1

Stop or protect: _____

Notify or hand off to: _____

Evidence a trained person still needs:

TOP ISSUE 2

Stop or protect: _____

Notify or hand off to: _____

Evidence a trained person still needs:

Correct the claim

“The code already told us the broken part, so we can skip the inspection.”

Use this frame: The clue shows [observation]. It does not prove [conclusion]. The safe next step is [authorized action] because [reason]. A [different career] also uses analytical reasoning when the worker [specific task].
