

Interview Appearance and Career-Brief Rehearsal

NAME _____

DATE _____

PERIOD _____

Page 1 - Choose for the Context

Appropriate interview appearance depends on the workplace, task, safety rules, format, and accommodation. The interviewer should evaluate preparation and role awareness--not brand, price, body, culture, religion, disability, or gender expression.

SEE ONE

CONTEXT	USEFUL PREPARATION	VERIFY BEFORE THE INTERVIEW
virtual customer-support interview	clean functional clothing, tested audio, private background, notifications off	camera expectation, access option, backup connection route

MAKE THREE CONTEXT DECISIONS

SCENARIO	PREPARED, CLEAN, FUNCTIONAL, OR SAFE CHOICE	ONE RESPECTFUL QUESTION TO VERIFY
office/customer-facing		
skilled-trade task demonstration		
virtual interview		

For a task demonstration, tools and PPE follow the employer/site instructions. Do not bring or use tools or safety gear until the route is confirmed.

How one accommodation or access need could change the plan without lowering the job standard:

Word bank: workplace/lugar de trabajo · task/tarea · safety/seguridad · accommodation/adaptacion · verify/verificar

Use this frame: For [context], I would choose [functional choice] because [task/safety/access reason]. I would verify [question].

Page 2 - Rehearse, Revise, Rehearse Again

Route: live partner / small group / teacher conference / recorded audio-video / AAC

Appropriate technology planned: timer + Canvas evidence card/teacher-approved visual / private recording / AAC

Technology actually used: _____

ATTEMPT 1

Time: _____ seconds

Content present: career / duty / preparation / labeled labor evidence / bounded conclusion

One exact strength and one exact revision:

MAKE THE REVISION VISIBLE

Before:

After:

ATTEMPT 2

Time: _____ seconds

What became clearer, more accurate, better organized, or easier to understand:

Final content check and final delivery/AAC check:

Checkoff: student _____ career _____ date _____ route _____ Attempt 1 ____
sec Attempt 2 ____ sec oral/AAC [] technology []
