

Emerging Tech Research Template

NAME _____ DATE _____ PERIOD _____

One career per sheet. Use the dated Emerging IT Career Evidence Guide and the named BLS page. Fill in all eight parts. You use this sheet again on Day 5 for your one-minute pitch, so write it so you can read it out loud.

1. Career Name

2. BLS occupation used.

Write the exact occupation title from the guide.

3. Source match.

Circle one: **EXACT BLS OCCUPATION** / **CLOSEST BLS OCCUPATION OR PROXY**

What is the limit of this source for your selected title?

4. What does this person do?

Write 2 to 3 specific work tasks in your own words.

5. Typical preparation.

Record the degree, experience, or range shown by BLS. Do not turn "typical" into a rule for every employer.

6. Median pay (BLS).

Write the national number and year.

7. Job growth rate (BLS).

Write the percent and year range.

8. Why is this work emerging or changing? Name the technology, demand change, or changed work task. A missing BLS title alone is not proof.

Evaluate the Evidence

Would you recommend this career to someone who wants rapidly changing work? Use at least two dated facts from your research. Explain one limit created by an exact, closest, or proxy source.

Optional DFW salary cross-check from Xello. Record it only when the exact title, geography, measure, and date are visible.

One-Minute Pitch Map

Write short phrases, not a second paragraph.

Career and BLS occupation: _____

What the worker does: _____

Preparation: _____

Two dated facts: _____

Exact, closest, or proxy - and the limit: _____

Why the work is changing: _____

☐ I can explain which facts describe my selected career and which facts come from a broader occupation.
