## DECISION TREE

05 / 10

1

When the user calls, what is the VERY FIRST troubleshooting step you tell them to try? (Use your micro:bit program.)

---

---

---

---

2

Why is that step FIRST and not a later step? One sentence

---

---

---

---

3

Branch the next move based on the result: IF the user says the first step FIXED the problem, what do I do next? IF the user says the first step did NOT fix it, what do I do next?

---

---

---

---
